For information: This is the first price rise since 2000. In the intervening 13 years energy costs have risen 105% and other costs 37%. The increased revenue generated by the new rates is essential to the running of the centre and the continued provision of services. We remain the least expensive community facility in the LBC area and one of the least expensive in NI. The management committee will always keep costs as low as possible for users.
